

Adzan Nugraha

I am a Product Designer, currently working at PT. Intikom Berlian Mustika and assigned to the auction and inspection project at the IBID Company. I help companies build better product experiences through research, analysis and empathy. In addition, I assist companies in improving the services provided by collecting some data from analytics and research, and conducting user testing

Experience

PT. IBID Balai Lelang Serasi • UI/UX Designer

August 2019 - Present

- Improve the end-to-end experience of auction on mobile and website platform by conducting usability reviews, identifying UX issues, and proposing design recommendations for IBID product
- Improve the end-to-end experience of inspection service by conducting usability testing, identifying UX issues, and proposing design recommendations for Astra Car Valuation (ACV) product
- Analyze data using Amplitude, Smartlook, and Google Analytics for evaluation of service improvement on IBID and ACV products
- Conduct product usability testing to ensure that the solutions that have been built can optimally meet their expectations with in-depth interview testing and with tools Maze Testing
- Build a design team workflow to increase efficiency and effectiveness in providing solutions to design problems
- Communicate and implement technical strategies with cross-functional teams (Product Owner, Back-end & Front-end Developer, and Quality Assurance)
- Helps manage the product by providing multiple options to keep the user experience good
- Manage product improvement work to prioritize based on urgency and monitor it for compliance with guidelines
- Build Design System for consistent UI elements and improve efficiency in the work of building design and process for handoff design to developers
- Received the best UI/UX Designer award at the IBID Fun Office event

PT. Indonesia Equipment Center • UI/UX Designer

July 2018 - July 2019

- Manage and developed a product web app for attendance employee on the site, from start to finish (research, design, usability test, and implement) as UX Designer with a team four fellows
- Adjustment of the company profile website to introduce the services offered by the company, measure user interest and understanding and get better results
